

# Warm Up # 1

- Copy the daily agenda into your agenda book.

Liz is making cookies for the annual bake sale at her school. Each batch of cookies takes  $2\frac{3}{4}$  cups of flour. If Liz needs to make  $6\frac{1}{2}$  batches, how many cups of flour will she need for all six batches?

# Warm Up #2

- Copy the daily agenda into your agenda book.

Kim has  $12\frac{3}{4}$  yards of material to make Halloween costumes for her children. Each costume takes  $2\frac{1}{2}$  yards of material. How many costumes can Kim make? How much material is left over?
